Aisling Fae

Technology Instructor

aislingfae@gmail.com

https://transfaeries.com | https://github.com/transfaeries

Hello,

My name is Aisling Fae. I'm writing to offer my services as a Technology Instructorfor your company. I have previously worked as a Software Engineer specializing in code readability and documentation at Mobilecoin, where our team's code was praised for cleanliness. Further, I have held roles as Communications Manager (Six Feet Up) and Chief Marketing Officer (Forest, Inc) for a startup which went on to exit successfully through acquisition. I specialize in making complicated things easier to understand.

I am currently a part time Math tutor for High School students, and have previously tutored students from as young as 8th grade up to college level. I believe in technology's potential to improve our lives and want to help improve people's relationship with technology by increasing their understanding of it.

I am confident that I can excel at any task required for the job, instructing certainly, but also planning, designing and anything required for the job. I'm empathetic to students and cognisant of their struggles, I want to help them succeed!

Thank you for reviewing my application,

Aisling Fae
